

Goal 2

Deliver visionary and distinctive interdisciplinary learning, discovery, and engagement that include collaborations and partnerships as part of the learning experience.

Goal Two

**Visionary
Learning and
Discovery**

Strategies

- Adding interdisciplinary and international educational opportunities.
- Establish and enhance international partnerships.
- Enhance student, faculty, and staff participation in global interdisciplinary experiences.
- Provide intellectual, physical, and technological infrastructure and financial resources that will effectively support the interdisciplinary program, and
- Enhance North Carolina A&T's global image.

Activities

- By August 2003, establish and/or enhance interdisciplinary academic centers and programs that will attract and enroll at least 10% (or 1,000 students) of the student body by August 2005.
- By August 2005, each academic center will establish and implement at least two partnerships with industrial, governmental, educational, or community entities.
- By August 2006, create international study, internships, and service learning programs for faculty and at least 10% (or 1,000 students) of the student body.
- Establish curriculum review and revision processes from general education through doctoral programs that encourage the inclusion of interdisciplinary and internationally focused curricula across the University's Colleges and Schools.

Expected Outcome

The interdisciplinary programs and centers will enhance the learning environment and image of A&T and the preparation and marketability of its graduates by providing increased participation in study abroad programs, international internships, and opportunities for international service learning.
